

# Claims

[c1] What Is Claimed Is:

1. An optical disc with a file structure used in a disc player, comprising:

a first folder for storing a plurality of MPEG encoded picture files; and

a second folder for storing a plurality of original picture files;

wherein said files stored in said first folder can be played by said disc player and said files stored in said second folder can be showed by a computer.

[c2] 2. The optical disc as claimed in claim 1, wherein each MPEG encoded picture file stored in said first folder has a corresponding original picture file stored in said second folder.

[c3] 3. The optical disc as claimed in claim 1, wherein said original picture files have the suffixes of JPG, BMP or GIF.

[c4] 4. The optical disc as claimed in claim 1, wherein said disc player is a DVD player or a VCD player.

[c5] 5. The optical disc as claimed in claim 1, wherein said optical disc is recorded by a personal computer, which

includes an optical recorder and an installed software.

- [c6] 6. The optical disc as claimed in claim 5, wherein said installed software has functions of editing, encoding and recording said original picture files.
- [c7] 7. The optical disc as claimed in claim 1, wherein said optical disc is recorded by a recordable player, which includes an optical recorder and an embedded software having functions of editing, encoding and recording said original picture files.
- [c8] 8. A method for creating an optical disc with a file structure used in a disc player, comprising the steps of:  
creating a first folder for storing a plurality of MPEG encoded picture files; and  
creating a second folder for storing a plurality of original picture files;  
wherein said files stored in said first folder can be played by said disc player and said files stored in said second folder can be showed by a computer.
- [c9] 9. The method as claimed in claim 8, wherein each MPEG encoded picture file stored in said first folder has a corresponding original picture file stored in said second folder.
- [c10] 10. The method as claimed in claim 8, wherein said orig-

inal picture files have the suffixes of JPG, BMP or GIF.

- [c11] 11. The method as claimed in claim 8, wherein said disc player is a DVD player or a VCD player.
- [c12] 12. The method as claimed in claim 8, wherein said optical disc is recorded by a personal computer.
- [c13] 13. The method as claimed in claim 8, wherein said optical disc is recorded by a special player.
